

Remote: Ardel, Anders, Heidar, Lidija, Miroslav, Roberto C.
(me) Ronald O, Vaspors.

Local: Pavel, Marc, Vladimir, Emanuel, Scott, Willy, Dave,
Bob C, David J.

Monday 19⁴⁵ in front of town hall.

Notes Monday: Dave J.

Anders Nordbygd CP moving over to TCS. But the
subscribers at AEPH due to bugs in MS. 2012 PL2.
(Same ~~cost~~ issue with Lockheed ~~PL2~~ TADP to
US-Fed.) This is a RAYF specific issue talking to
ADFS.

This blocks TCS personal in .edu.

So: new Nordbygd CP.

Scott Ree: TFG PM2 update.

Next meeting Oct 20-22 in Valparaiso.

Vaspors: - IRAN-CIRIS: new copies not ready yet. waiting.

MaGrid: reviewers impossible. Reviews are both embarrassed.

PLGrid: ~~copy~~ is ready technical things all fixed, but not
a CP/CPS yet. It's a growing priority.

Ulfste: new CP/CPS by mid aug. Willy started review, Ursula has
a copy.
2-3 niks.

LIP: with reviewers, they know.

MREN: ongoing. going well.

CBG: 2nd round will be resent.

phIPIS Grid: reviews think its done.

NIF: Jens is sitting on it, Anders unknown.

MD-Grid: last iteration.

Stovch Grid: And normal updated.

Arme SFO: just start anew in 2015

MARGI: gone to sleep.

self audit reviewing is not improving anymore. Maybe holidays? H2020?
There should be more efforts.

Willy: Austrian Grid CA

- end of road March 2015. so withdrawal by end of Feb. 2015.
- multiple email addresses in SPIN only recognised by few clients.
(Thunderbird is OK, others may only use the first).
- code signing is getting more complicated. need for specific trust anchors.
need X.509 code signing (OU name for certs, need new X.509 for FIS & Polite as well).
- dual name space OI.
- new name for CA as well. → "-strip cocheck" in VONP.
- if a CA cert policy OID implies "valid for anything in my trusted path".
- HSM session issue: passphrase should not be retrievable
↳ online CA guidelines need to document this.
normally the session to the HSM is retained, but the OpenSSX CA.sh script cannot do that.
- registration database for institutions will be audited.
(and insurance is logged and tamper evident)
and the RA still has to approve it.

Austrian Grid - Reviewers (quickly please): Scott. + David G.
 Bg. ACAD - Vladimir

changes even?

2048 bit is still ok also for CA's in a 2016 for IETF

(although hedge is getting more prevalent) 2048 is
 allowed for constrained environments

or change CP/CPS and re-issue. current root of some hypertext

Reviewers: Pavel + David.

CP/CPS by October.

Willy needs CP/CPS by October.

draft by end-of-November

withdrawal by end-of-Feb.

Lunch.

Robot Naming.

- Ben's comments:
 add contact service.
 publishing the cert already does that.

edit only does client, not server both.

SPAN to add both address + fqdn.

AARC

Online.

activation of key from data in memory.

Willy's idea on env. var on 'shell'.

now forbidden, with "x" ...

~~Eric~~ APG Grid PIP

Austrian Grid now will extend for some time whilst reconstituting

the new online CP

passes serial

due to clarification on how CA registration

Eric - APG Grid PIP

Airline - some vice chair

meetings in June

~ 3-4 people to ISG

Bob Corles (XSIM)

close with Nelly et al

Ronald O (GENET)

- > - move to online CP. -> still unclear (imacul B)?! -> move to CP depends on EJB CA
- new 1.0.1 CP/CPS reflects online CP.
- > - national service for RSE affected STE's & IBM? & all liberally interpreted.
- > - etc naming? & will be done.
- EJB CA seems online only?

↳ GENET. Jan C & Daniel Mouril

(ACT) + Willy reviewing

now target is +1 mo for new CP. begin Oct

Coffie

Dave H. Ullrich. CIA & SPANET.

- split off of CP may help for other systems (link to RPS, SPANET).
- keeping namespaces is virtually impossible if registration processes change.

→ the kind of programmatic change like OS went through is not possible here
 CN has to change.

non-academic use remains a (general) issue → 1999/2000!

Dave H. - TCS.

other examples eg 'spamming' at appropriate level @ clartmawt

* guest & SME identities.

TCS / Dave H.

reviewers: Dave H, Reimer will agree to have a look at the update (not a new accreditation, but fix up self-audit at the same time).

Digic.

Link

LOA. follow reference format for LOA.

both NIST & clartmawt are too long. DirectTrust is specific (and mostly common-sense).

DPCC & RPS are fairly short and free format as well.

FRF over video: - check link out of hand.

- live? questions. beware of actor animated (it's way better than a cat :-)
- who initiates the call? Virtual Introducer
- pin code via videochat to link to CSR
- documents are also needed.

Between LOA and AP need glossary

QV. Stephen / Barry.

✓ SNA-250 upgrade then included for grid.

(which hierarchy is still open)

the grid CA's are audited under WebTrust. (EUY)

for MICS a new ICA is needed.

↳ needs doc on backend IDH.

(ACT) SWITCH-QV representation to QV.

(✓) endorsed.

(ACT) change to IGTF cluster

S/A. classic.

Ans Cert. → classic

validation process. CP/CPS updates needed.

Send to PMA reviewers to comment. to lost.
processes are different in Res Cert.

MICS planned for later. (early 2016?) no customers yet.
(for STANET).

33rd PMA Berlin meeting.

IGTF all hands

ISCC?

agenda w/ global cooperation.

LOP

RPS

Profiles

Re-locating? MARR, REFECS, FIMLR/VAMR?

EU Grid P119 32.

Nedim

Remate: Alina, Lidija, Miroslav, Shakhin, Ronald O / ②
Cosmin

Scott Rec / RPS

(see presentation)

background: communities were longer lived than the infra projects

the case of work load for RPD on reviewing.

- no lone RPS accreditation

- only as a party to an already accredited CP's.
so it always gets sponsored in by a CP.

- no lone communities

⇒ - the CP is always responsible!

it can also make it easier since it changed to CP/CPs
are structured.

(brand new members with CP+CPs+RPS may take more work initially)

Edit Google docs [URL in agenda]

start at section 5.3, <DPN> → name.
real-time editing in a copy in MS-Word.
